

## INVESTMENT OBJECTIVE

To provide income while investing to provide some capital growth over the medium to long term.

## INVESTMENT POLICY

To achieve the investment objective, the sub-fund will seek to invest principally in equities. The Fund may also invest in exchange traded funds (ETFs), fixed income securities (bonds) and collective investment schemes (CISs). When selecting equities for the sub-fund's portfolio the Manager will apply a 'value' based policy - including an asset in the portfolio when Thistledown's analysis and expertise suggests that a total return over the full investment cycle or longer of at least 2% over the total return that could be expected from UK equity investments over the same period (i.e. between 5 and 10 year horizons) is achievable from that asset. Achieving these target returns for each equity investment or for the sub-fund's portfolio as a whole is highly uncertain as equities are volatile assets and are expected to be the principal portfolio investment. The Manager will hold ETFs, bonds, CISs and cash when it cannot identify enough opportunities to achieve a suitable spread of equity investments with the appropriate 'value' characteristics.

The Manager will also seek to reduce investment risk by diversifying the Sub-Fund's investments across industries and countries. It will not consider the size of company or market important to its investment decision provided Thistledown and it believe the investment helps to diversify risk. Investments in assets denominated in foreign currencies will not be hedged into sterling.

The Manager must ensure that the Sub-Fund maintains sufficient cash for the purposes of maintaining liquidity. This portion of the sub-fund's assets must be represented by cash or similarly liquid assets (which may include money market instruments, deposits or units in collective investment schemes) at all times.

The Sub-Fund's portfolio and mix of asset classes will be rebalanced from time to time at the absolute discretion of the Manager.

## RISK PROFILE

The fund should be considered high risk.

## FUND COMMENTARY (PROVIDED BY THISTLEDOWN)

Last quarter was busy. We sold the holding in National Grid. We have held this for only 18 months but PGE, a Polish utility, added in its place is cheaper, has lower borrowing, less risk of tough regulation, and is exposed to the strong Polish economy. We invested in Cape Plc. We had reviewed the business before a recent profit warning and used the fall in its price to invest. A small presentation of our reasons is available on YouTube. ([Click here](#) to view) We will provide more presentations of this sort if you, the investors want. Finally we bought a holding in Phaunos Timber Fund. This fund stood at a 50% discount to its most recent asset value. We have met the management a number of times. We spoke with the new Chairman who has a real understanding of timber investment and manages woodlands himself. This gave us confidence in the strategy of the board and the quality of the assets. The fund pays a dividend of over 5% per annum and we believe this should almost double as the plantations mature over the next 10 years. These investments meant that by the end of the quarter cash and bonds represented 20% of the fund.

**THE VALUE OF INVESTMENTS CAN FALL AS WELL AS RISE – YOU MAY GET BACK LESS THAN YOU PAY IN**

## INVESTMENT PROCESS

The SMARTfund Thistledown Income Fund aims to provide a reasonable income while preserving the real value of the capital over the long term. The Manager believes this objective is most likely to be met by following a 'value style', and being sensibly contrarian. This means that the fund will try to invest in areas that are demonstrably cheaper than average and where the majority of other investors are not interested. However, the Manager believes it is essential that the investments have strong fundamentals and particularly that companies do not have large debts.

The fund has a bias to UK equities. It will not invest more than 4% in the equity of a single company, with the exception of collective funds. The Manager will hold cash or fixed interest when there are no suitable investments identified. The fund will also hold overseas equities that meet the 'value style' criteria as well as collective or exchange traded funds where the underlying markets meet the same criteria.

Despite the large percentage invested in equity, the process includes a 'margin of safety' to avoid a permanent loss of capital. This is provided by holdings with low valuations and a robust financial position. The Manager believes the investments held will be re-valued by the market and in the meantime provide a reasonable income. The Manager will not chase 'flavour of the month' sectors or companies and as a result is less concerned with stock market fluctuations than fundamental changes in the position of the businesses they have invested in.

Given this investment process the Manager considers their objective will be achieved if the income of the fund grows in-line with or ahead of inflation over time. This means that the fund, particularly if it holds cash in a rising market, is likely to produce returns that are significantly different to the UK equity indices.

## THISTLEDOWN

Thistledown Investment Management Ltd was founded by Dominic Fisher to provide an investment management service that he would want for himself. He has been joined by Peter Wyatt, who shares a similar philosophy. The firm is an independently owned investment management firm that uses a 'value style' investment approach that it believes has the best chance of producing above market returns over time. The firm's principals, who have worked in financial markets for over 20 years, have a substantial personal investment in the funds managed by Thistledown, including the SMARTfund Thistledown Income Fund. As such they have a strong interest in common with investors in the SMARTfund Thistledown Income Fund.

Prior to Thistledown, Dominic was a Director and portfolio manager at OLIM Ltd for UK charities, individuals and investment trusts with an income bias. The bulk of his career was spent with Mercury Asset Management managing charity portfolios. Dominic is Chairman of the investment sub-committee of Armed Forces Common Investment Fund and a Director of Aberforth Geared Income Trust plc.

Peter trained with KPMG and spent 20 years in Equity Research with Merrill Lynch, Credit Lyonnais and Nomura covering numerous sectors. He then joined Investment Banking, heading up Nomura's EMEA Real Estate Team until April 2009. Peter has worked with Dominic since September 2010 and joined Thistledown in March 2011.
